

VOLCANOES' NIGHT - A QUICK GUIDE FOR ORGANISING YOUR OWN EVENT ON 29 SEPTEMBER 2017

Volcanoes' Night I-II-III was a European Researchers' Night (ERN) project series funded by the European Commission's FP7 and H2020 programs which ran between 2012-2015. The objective of the project was to use volcanoes as a background against which the role of geoscientists could be explained to the public. EC funding for the project ended in December 2015, and our aim is now to maintain information services, promote the organisation of similar events, and disseminate the scientific achievements of the project.

A 10 POINT GUIDE FOR ORGANISING YOUR OWN VOLCANOES' NIGHT:

- 1 Funding:** Upon request we will provide you a Letter of Support that you can use to raise funding for your event. The letter will be signed by the Project Coordinator of VOLCANOES' NIGHT I-II-III;
- 2 Brochures and banners:** We will send you the original design files that you can edit and adjust as needed;
- 3 Networking:** We will link you with other groups in Europe and around the globe. We will also provide you with information on who else is organising similar events in your country;
- 4 Methodology:** You may use all our existing reports, documents and files that were produced during the VOLCANOES' NIGHT I-II-III project period.
- 5 Date:** Last Friday of September: This year's date is 29th September. If you wish to organise VOLCANOES' NIGHT on another date, please get in touch with us. See [European Researchers' Night](#) for further information.
- 6 Size:** VOLCANOES' NIGHT is not defined by the size of the event, but rather the methodology that you will use to engage with the public.
- 7 Partnerships:** You are welcome to team up with other groups or you can just organise your event on your own.
- 8 Name:** You may adapt and/or expand the title of VOLCANOES' NIGHT if this is necessary for your success (for example referring to a geographical location or to other thematic areas).
- 9 Agenda:** Download the [Final Recommendations](#) and our [EGU2017 poster](#) from our website for some ideas on how to shape your programme.
- 10 Use:** You will be granted use of our results for non-profit purposes, specifically where the aim is to promote geosciences and to bridge the gap between the public and geoscientists.

Detailed conditions are available on our [website](#).

Disclaimer: You will be granted permission to use results from this EC-funded project under the provisions of and in accordance with Part C, Section 1, Article II.26 of Grant Agreement No. 316558 [VOLCANOES' NIGHT](#).
